

CLAIMS LEASED

Mining Men From Mexico Take Over Gold and Copper Mines in Otero.

Alamogordo, N. M., June 25.—Manuel Gutierrez and Jose W. Blackwell, old Mexico mining men, have secured by bond and lease, 20 mining claims belonging to J. L. Purdy, of Tulsa, Okla. The price paid for the lease was \$17,000. The mines are near the head of Tecolote canyon, 25 miles northeast of Alamogordo.

Gutierrez and Ramonetti have also leased the Mayfield mining claims, six in number, which are located near the Tecolote claims.

A force of men is at work on each of these properties and more is being regularly shipped to the smelter at El Paso. The ore from these claims bears a heavy percentage of copper besides a small amount of gold.

Besides the lease price, the lessees have agreed to pay a royalty to the owners on the ore taken from the mines.

RAILROAD TO WHITE MESA MINES IS CONTEMPLATED

Flagstaff, Ariz., June 25.—If the White Mesa mines, 110 miles northeast of Flagstaff, prove to be a big porphyry copper deposit, as expected, a railroad will be built from Flagstaff to the property.

Several engineers employed by the Arizona Navajo Copper company are in the field sipping out the most available route for the proposed railroad. It is understood that surveys will soon be run.

The building of the road is contingent upon the White Mesa proving to be a big porphyry deposit, like Ray, Miami and Chino. Even if it does not prove to be as big as these deposits, a great deal of ore is there.

TWO CORNELIA COMPANIES TO SINK 500 FOOT SHAFTS

Ajo, Ariz., June 25.—Announcement is made that the Cornelia Extension and South Cornelia companies are soon to commence sinking 500 foot shafts. The South Cornelia shaft probably will be on the claim known as Wall Street No. 1. A camp will be established on the property in a few days and some exploratory work done before a site for the shaft is finally chosen.

The Cornelia Extension company has already ordered all necessary machinery and the property is now being surveyed.

A small force of men is at work on the Copper Mountain group, 15 miles south of Ajo, recently taken over by the Guggenheim interests.

THINK YUMA CONSOLIDATED HAS RICH GOLD BEARING ORE

Quartzsite, Ariz., June 25.—Mining men believe that the Yuma Consolidated company has opened an immense underground bed of gold bearing gravel.

The real "pay dirt," a damp red gravel, was struck at 30 feet. From that point down to 30 feet, where bedrock came in, the gravel averaged 15.24 per cent. The lower nine feet ran 10.48 per cent. The first 20 feet of the shaft, 10 feet in surface gravel, that carries 14.42 per cent, but from 20 to 30 feet there is a hard conglomerate that runs colors only occasionally.

Another shaft is being started 200 feet away. The two will be connected with a drift along the bedrock.

BUYS THREE MINES TO GIVE ORE SUPPLY TO NEW SMELTER

Prescott, Ariz., June 25.—G. L. Lemons, of London, England, who secured the Prescott city franchise as a site for a smelter to be erected with English capital, has purchased William Linden's Colorado mine, on Green creek, the water holdings of J. C. Swartz, in the Bradshaw, and the Great Belcher on Big Blue creek, owned by George Lemons. The states that these properties have been acquired in order to ensure a regular ore supply for the smelter.

Lemons will leave next week for London. He says that he will return in three months and then the construction of the smelter will begin.

BLACK GOUGE SPRINKLED WITH GOLD IN PIONEER MINE

Calumet, Ariz., June 25.—Black gouge sprinkled with free gold is being taken from the Pioneer mine, a drift run eastward on the 300 foot level, of the Pioneer mine. The ore is being sacked and guarded with extreme care. No recent account has been given of the strata known, however, to be only an inch or two wide. The remainder of the ledge runs 15 to 18 per cent in gold.

TWO MEXICAN BOYS LOSE THEIR WAY; POLICE TOLD

Leaving their home at 321 Alameda avenue Tuesday afternoon, Roberto and Jose Gutierrez, age seven and eight years, respectively, have not been seen since, and the police department have been asked for information in looking for them. The boys were told to go to San Jacinto plaza to direct a woman who was in search of work to the Gutierrez home, and are believed to have lost their way.

TEARS OF DESTITUTE WIFE GAIN FREEDOM FOR MEXICAN

A tearful plea by an aged Mexican woman that her family was in a destitute condition because the husband and father was serving out a sentence in the city jail caused police judge Charles Pollock to commute the sentence Tuesday of Miguel Ponce serving out a term for vagrancy. Ponce was arrested about a week ago on lower 32d St. Paso street.

DAN L. CARSON REPORTS THIEF TOOK WATER HOSE

Theft of 40 feet of water hose was reported to the police department Tuesday afternoon by Dan L. Carson, a contractor, who stated that the hose was taken from a residence under repair at the corner of 25th and Montana streets. The hose was lying in front of the house and recently been used for dampening cement.

HOT WATER AND "ANURIC" BEFORE MEALS—AND HEALTH

All people in America and especially those who are past middle age and are prone to eat too much meat and in consequence deposit lime in their arteries, veins and joints. They often suffer from twinges of rheumatism or lumbago, sometimes from gout, swelling of feet, such conditions are not always able to exercise sufficiently in the outdoor air or drink enough pure water in order to sweat freely and excrete the lime. Dr. Pierce has conducted experiments and thoroughly tested a uric acid solvent at his Invalid Hotel and Surgical Institute which he is convinced is many times more potent than lithia—this he named "Anuric." It can be had at almost all drug stores or simply asking for Dr. Pierce's Anuric for kidneys or backache. It will overcome such conditions as rheumatism, dropsical swellings, cold extremities, swelling and burning urine and sleeplessness due to constant need of getting out of bed at night.

Our grandmothers have told our mothers and our mothers have told

SILVER AND GOLD OUTPUT OF 1915 SHOWS A GAIN OVER THE YEAR 1914

WASHINGTON, D. C., June 25.—The bureau of the mint and the geological survey has issued the following joint statement as to the final figures on the production of gold and silver in the United States during the calendar year 1915:

	GOLD	SILVER
	Fine Ounces.	Fine Ounces.
Alabama	247	5,100
Alaska	568,195	1,054,454
Arizona	229,292	4,555,500
California	1,090,731	2,547,400
Colorado	1,089,928	2,530,300
Georgia	1,681	24,500
Idaho	55,628	1,170,500
Illinois
Michigan
Montana	240,825	4,575,300
Missouri
Nevada	274,874	11,432,700
New Mexico	70,625	2,400,000
North Carolina	8,255	170,100
Oregon	30,321	1,867,100
Philippine Islands	62,828	1,320,500
Porto Rico
South Carolina	174	3,500
South Dakota	358,145	7,402,500
Tennessee	229	6,500
Texas	57	7,500
Utah	135,045	2,807,300
Vermont
Virginia	22,710	461,500
Washington	672	12,300
Wyoming
Totals	4,887,604	101,635,700

The figures are compiled at the average price of silver per fine ounce for the calendar year 1915, \$0.49889.

These figures compare with the production of 1914—\$94,531,800 in gold, and 72,455,100 fine ounces of silver, being a gain in the gold production of \$6,503,900 and 2,505,975 fine ounces in the silver product.

The figures are compiled at the average price of silver per fine ounce for the calendar year 1915, \$0.49889.

These figures compare with the production of 1914—\$94,531,800 in gold, and 72,455,100 fine ounces of silver, being a gain in the gold production of \$6,503,900 and 2,505,975 fine ounces in the silver product.
